

Programmable Thermostats

Programming Savings

The Programmable Thermostat offers all that digital thermostats do, plus they can be programmed to automatically adjust your home's temperature based on your schedule and lifestyle. If you're looking for total home comfort and to save as much as 18% on your energy bill then this type of thermostat would be great for you. Other key benefits of this programmable thermostat include ease of use, award-winning design and power outage program protection. They can be programmed to adjust your home's temperature up to four times a day, with 5/2 day or 7 day programming and are available in a number of different models for many different HVAC systems. Ask your dealer which model is right for your system.
