

LENNOX® INDOOR AIR QUALITY

**HEALTHY CLIMATE™
HEAT & ENERGY
RECOVERY VENTILATORS**

**GIVE YOUR HOME
THE GIFT OF LIFE.
LET IT BREATHE.**

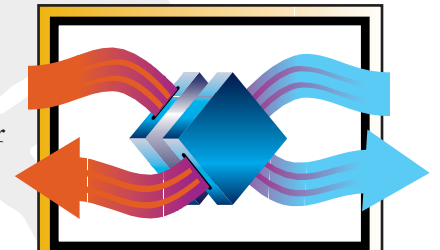

*If you've
been waiting
for a way to
bring fresh
air into your
home without
losing energy
dollars, you can
stop holding
your breath.*

*Now you can breathe life into your home without
throwing energy dollars out the window.*

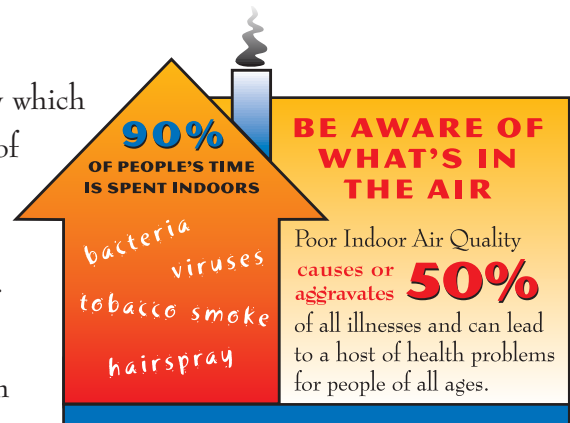

Give your home the opportunity to breathe in the fresh outdoor air and release its stale, polluted indoor air without sacrificing energy dollars. Breathe new life into your home with a Lennox innovative Heat Recovery Ventilator (HRV) or its Energy Recovery Ventilator (ERV) so you can breathe easier too.

*HRV/ERV ventilators bring
fresh air into your home and
exhaust the stale air out.*

BREATHE EASIER WITH LENNOX INNOVATIVE VENTILATORS

If odors linger in your home, such as last week's fish fry which you could probably do without, it might be an indication of indoor air pollution. Because of energy concerns, many newer homes have been built so airtight that there is little, if any, ventilation, which can lead to poor indoor air quality and serious health concerns. One way to combat poor indoor air quality is to ventilate your home with fresh outside air. The challenge is to introduce fresh outside air without losing precious energy dollars or lose the comfort qualities of the existing conditioned indoor air. Thanks to some clever engineering, Lennox has devised a way to do just that with its Heat Recovery (HRV) and Energy Recovery (ERV) Ventilators.

According to the EPA, the air inside your home can be up to 100 times more polluted than the air outside.

OUT WITH THE BAD, IN WITH THE GOOD.

The Heat Recovery (HRV) and Energy Recovery (ERV) Ventilators are key elements in the battle against poor indoor air quality (IAQ).

Heat Recovery Ventilators - HRV

- Designed for colder climates
- Retains the heat from the air before it exhausts it
- Greatly reduces damaging high humidity that can ruin windows, insulation and even furniture

Energy Recovery Ventilators - ERV

- Designed for warmer, humid climates
- Reduces the humidity in the fresh air supplied to the home
- Offers a continuous flow of fresh air

For over 100 years, people have trusted Lennox to keep them comfortable. With the HRV and ERV, that tradition continues. Year after year, you'll enjoy efficient, reliable comfort, and you'll breathe easier.

SELECT THE CORRECT HRV/ERV TO MATCH YOUR CLIMATE

HEALTHY CLIMATE SOLUTIONS

Lennox Healthy Climate™ products provide sensible and practical solutions to indoor air quality concerns. Solutions you can trust for healthier indoor air.

- Innovative indoor air quality solutions
- Products designed and tested to rigorous standards
- Healthier home environments

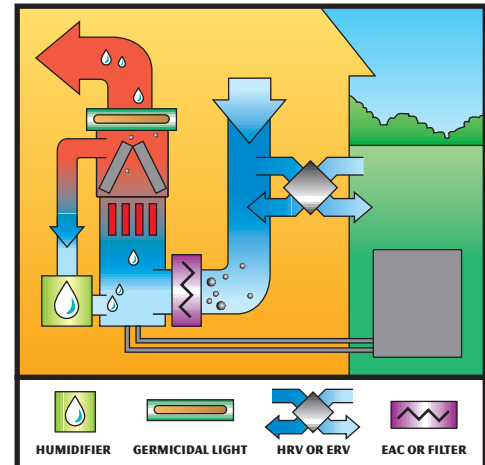

Lennox Healthy Climate solutions, such as air filters, and electronic air cleaners, humidifiers, and germicidal lights make it possible to improve the air quality in your home.

For products you can rely on, look for Healthy Climate solutions from the company you trust—Lennox.

QUALITY DEALERS YOU CAN COUNT ON

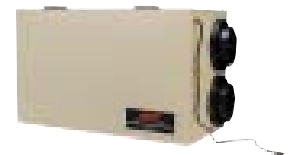

Choosing the right dealer is every bit as important as choosing the right brand of equipment. Every Lennox Dealer, which includes independently owned and operated businesses, has to meet the Lennox Quality Dealer standards. We think you'll agree they're a big reason why you can count on getting quality customer services whenever you call your Lennox dealer.
